

Galaxy Z Flip 4

Key Features

Style and function that fits in your pocket

It's a pocket-sized statement piece. Small but mighty when folded, this phone is compact enough to fit in your palm, but leaves a big impression with sleek, hazy colours that match your vibe.¹

Cameras that capture life with new perspective.

Take advantage of this camera phone's agile angles. Quick Shot lets you shoot a selfie right from the Cover Screen, even allowing a ratio change to show you the full frame before you shoot. Or unfold and take position with FlexCam holding up the camera so you can get a hands-free group shot or selfie at mind-blowing perspectives.³

Flex Mode: A big flex that stands on its own

Flex on your friends with their unbending screens. Unfold to your angle of choice and watch the Main Screen transform into Flex Mode.³ With Flex Mode Touchpad, easily control your apps while in Flex Mode as you play music or videos, use your camera and more.

Our toughest Samsung Galaxy foldables ever

The world's first water-resistant foldable smartphones have never been so strong.² These scratch-defying devices are our toughest ever with exclusive Corning® Gorilla® Glass Victus®+ on the outside and the super durable Ultra Thin Glass on the inside. And the hinge is protected by Armor Aluminum — our toughest aluminum frame.

Faster charging speed. Longer battery life.⁴

An upgraded 4nm processor works with the long-lasting 3700mAh (typical) battery to power through the hours.⁵ When it's low, plug in for Super Fast Charging, or bypass the cord with Fast Wireless Charging 2.0.^{6,7} With all that power to spare, you can even share a charge with your friend or your earbuds with Wireless PowerShare.⁸

See what's important in a glance with Cover Screen

The 1.9-inch Cover Screen now gives you even more information and control.⁹ Customise the clock face to your heart's desire for the mobile version of self-expression. Then check the weather, access Quick Settings or add widgets. And when the messages roll in from the group chat, you can easily respond to them without needing to unfold.
