Key Features

More innovation, less footprint

Ultra's striking symmetrical design returns with one major difference: recycled and eco-conscious materials. From the metal frame to the glass finish, it's polished with fresh new colours inspired by nature.

Note's signature tool comes built in

The built-in S Pen keeps the legacy of Note alive. Plus, it helps you ditch the dependency on notebooks, making sketches and jotting notes effortless and eco-friendly.

Low light. Camera. Action

A Pro-grade Camera grabs brighter photos and video, dusk to dawn. The intelligent pixel sensor adapts to low light with Nightography and the camera lens tones down flare for clearer captures.

200MP. Wow-worthy resolution

Resolution on the Wide-angle Camera has nearly doubled, delivering strikingly clear photos. Zoom and crop your shots for a whole new view — or leave it intact for brilliant detail, corner to corner.

Power for those who don't pause

Your quest for epic mobile gaming is over. Snapdragon® 8 Gen 2 Mobile Platform for Galaxy optimises and streamlines your device for silky smooth games — without draining the battery.

Game for hours and hours

This intelligent 5000mAh (typical) battery saves power for when you use it most, so you can keep gaming and streaming late into the night.

A brighter future in sight

Dynamic AMOLED 2X delivers clear details onscreen, whether dimmed down low or full-blast brightness. And 120Hz technology intelligently optimises the refresh rate to smooth out action and save on battery.

Your Galaxy, the way you like it

One UI maximises customisation, allowing you to control the details, from lock screens and themes to widgets and notifications.
